Professional Profile

Software Engineer with strong academic foundations and practical experience in full stack development using Java Spring Boot, TypeScript, and React. Skilled in SQL databases, testing, and containerization tools like Docker and Kubernetes. Adaptable team player with experience living abroad, bringing excellent intercultural communication and a global mindset. Eager to contribute to building scalable, efficient solutions in dynamic environments.

Professional Experience

Jr. Full-Stack Developer at BestSeller, Málaga

Oct. 2024 – Present

- Developed and tested web applications using TypeScript, React, Bit Cloud and Jest.
- Contributed to backend services built in Java with Spring Boot, using tools such as Docker, Kafka, RabbitMQ, MySQL and PostgreSQL.
- Used observability tools like Datadog (metrics, logs, synthetic tests) to monitor and improve application performance.
- Worked in Agile teams, participating in daily stand-ups, retrospectives, and sprint planning.

Internship at NTT Data Europe & Latam, Málaga

Mar. 2024 – May 2024

- Supported supervisor-assigned tasks and attended meetings with follow-up reports.
- Worked with PL/SQL for ETL processes.
- Built visual dashboards using Tableau and Qlik Sense.

Education

Bachelor's Degree in Computer Science, University of Málaga

Sept. 2019 – Nov. 2024

- Comprehensive training in software design, development, and architecture, with a strong emphasis on logical reasoning, problem-solving, and algorithmic thinking. Gained solid foundations in programming, data structures, databases, systems architecture, and software engineering methodologies—skills that now support my work as a developer in real-world environments.
- Honors in Web Engineering and Cognition & Communication in Software Engineering.
